To whom it may concern,

Wiegand has been operating and installing Alpine Coasters and other leisure rides throughout the world since 1977. The first Alpine Coaster was invented by Josef Wiegand and implemented into one of his own resorts. Since that date there have been more than 250 Alpine Coaster installations world wide including more than 30 in North America. Wiegand owns and operates several of these installations and can offer the utmost assurances that noise has never been an issue for Alpine Coasters. We have installed on locations ranging from secluded mountain sides to curbside on busy city streets and everything in between. For several of these locations there were noise concerns prior to the installation and operation of the Alpine Coaster, but after the rides opened there have been no more complaints on the matter. For your consideration please find below the signatures of current Alpine Coaster Owner/Operators verifying that they have had no issues what so ever with noise from their Alpine Coaster since the ride opened. Thank you for your time and if you have any questions about the information provided or about Alpine Coasters in general please feel free to contact me any time!

Sincerely,

Torsten Wedel
