

City of Leavenworth Request for Proposals Purchase of Advanced Metering
Infrastructure (AMI) System
RFI Request
Additional Question/Answers
March 4, 2020

1. RFI #3 states, commercial meters are primarily located in buildings. 99% of residential meters are located at the ROW; however, the list of addresses provided in the #3 RFI response under Water Description indicate that there are approx. 732 Inside Resident, 229 Inside Commercial, 11 Inside Senior, 59 Inside Multi-Family.

Questions:

1. Will you define ROW? ROW refers to City and/or County street or road "Right-of way". Most residential meters lie just outside those recorded ROW's. Those ROW's will not be marked or surveyed for this contract.
2. Does the description of INSIDE always indicate an indoor set that requires scheduling to gain access? Inside refers to Inside Leavenworth City Limits.
