Subject: Steering Committee - Thoughts and Potential Agenda Items

Hey Ana and Lilith, Hope Tuesday is going great for ya!

I forget the exact dates when board members joined this community committee, but most current members have jumped in after the many years of discussion regarding the Front St Park Renovation, Plaza Concepts including the 700 block triangle plaza as well as the parking structure ideas and funding. I feel there may be value adding some of the more important items to the agenda so that we can discuss the current status and historical thinking behind these ideas?

Here are three potential discussion items for the agenda...

1. Front Street and Front Street Park Plaza Concepts – I have attached the image of concepts no 1 and no 3, but cannot find the improved version that Brennan may have built after feedback. Do you happen to have a more current version? I am sure there is a more current version, but I can't find it.
Did we vote on this concept and provide some direction to have Brennan continue this work?
2. 700 Block Corner Park – I have attached the image of the last version that I could find. I feel that improvements were made?
Do you happen to have the final bid version of this?
Does the City still have the 300k in funding set aside for this work?
Covid Permit for Concept Validation – I have attached an image that I sent to the City (Sketch) this Spring that the City indicated could be permitted via a Covid temp permit. It was mentioned that the approval process would need to go through the Steering Committee. Is this still the best path forward? If so, I would love to talk about it with this group.
3. Parking Structure and Funding – We are not part of the parking committee, but I do feel that the work that we put into LID/BID funding options are very important to this process and understanding the path to keep things moving. If this is going to progress, we need the City to support the concept, select a site and back the work that is required for the LID BID options.

Thank you for your consideration! Oliver
